New watermakers for 2012

The watermaker with no high pressure hoses!

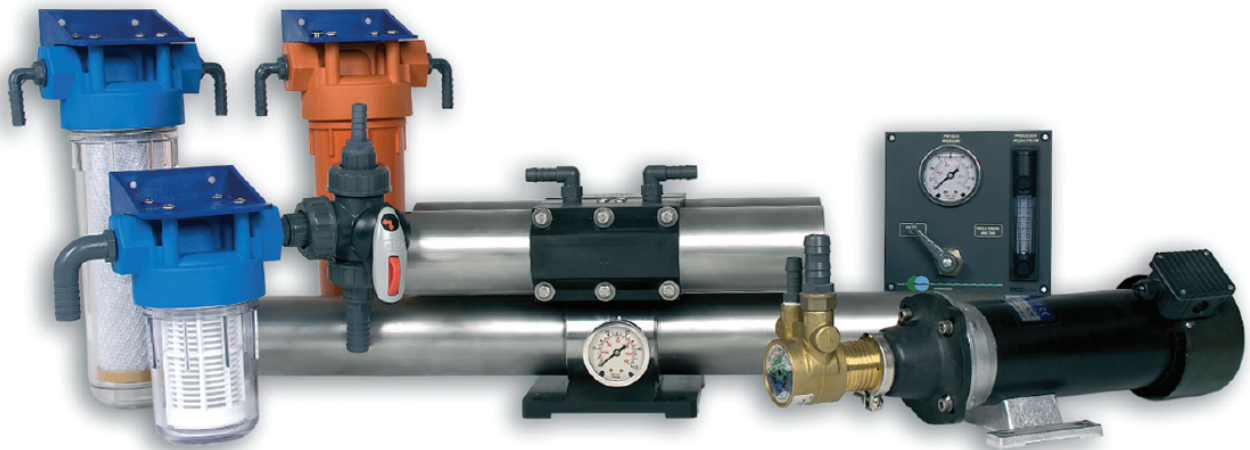

INTEGRAL SERIES

I-30

I-30 INTEGRAL SERIES

NEW

www.sailfishmarine.co.uk

Watermaker system by reverse osmosis with a rated production of 30 litres / hour.

Equipped with the new ECO-SYSTEMS watermaker I-50/16 high pressure pump, with energy recovery of up to 80%. Developed and patented by Eco-Systems Watermakers

This system is based on the B-30 Model, with the objective of providing a simple watermaker that covers the most basic fresh water needs.

The I-30 model integrates in one single element the ETD (Energy Transfer Device) high pressure pump and the reverse osmosis membrane, avoiding the installation of high pressure hoses, which makes it easier to install.

SIMPLE AND EASY.

Technical specifications and consumptions are the same as those of the Basic Series.

Total weight: 23 Kg.

Very quiet and free-vibration operation.

Modular configuration system, that allows make use of any small spaces available on board to install all the elements.

Very simple, reliable and easy to use
