Bilgemate

MULTI ZONE GSM BILGE WARNING SYSTEM

NEW!

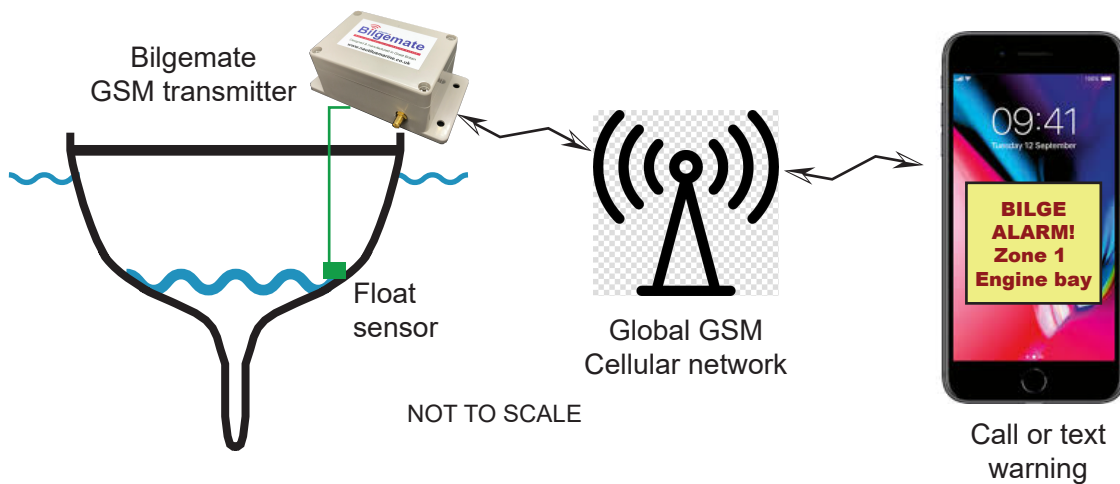

The bilge warning system that immediately calls or texts you if a problem occurs

Peace of mind when your boat is in the water unattended if water in the bilge is detected

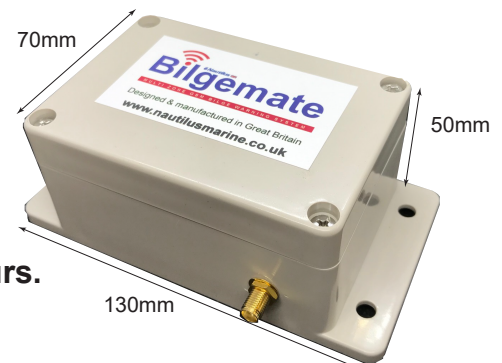

Bilgemate immediately calls or sends text message to your phone allowing you to arrange service before any expensive damage occurs

Bilgemate from Nautilus Marine monitors your bilge for water completely independently from your bilge pump system, and if it detects water it will immediately call or text you using the GSM global cellular network to advise you of the problem.

12 or 24v DC operation and is available as a 2 or 4 zone monitoring system.

- ✓ Peace of mind if your boat is unattended in the water.
- ✓ Invaluable if your boat is on a swinging or trot mooring.
- ✓ Small and compact - easy to install 130x70x50 mm
- ✓ Remedy the problem before any expensive damage occurs.

Special introductory price £279.00
